

Summer 2022 School

Registration
now open!

28th August - 03rd September 2022
University of Cape Town/South Africa

Valuing options of adaptation to climate change using choice experiments

The objective of the Summer School is to present Choice Experiments as a tool for trade-off assessment to participants from Sub-Saharan Africa. It offers a unique opportunity for early-career researchers to learn from and interact with experts and to present their own work.

Topics

- Theoretical foundations of consumer theory
- Design of Choice Experiments with a specific reference to adaptation to climate change
- State-of-the-art models for the econometric analysis of discrete choice data
- Interpretation of results with respect to policymaking

Experts teaching the course

Prof. Dr. Djiby Thiam - *University of Cape Town, South Africa*

Prof. Dr. Katrin Rehdanz - *Kiel University, Germany*

Dr. Petr Mariel - *Universidad del País Vasco, Bilbao, Spain*

Dr. Jürgen Meyerhoff - *Technische Universität Berlin, Germany*

Venue

The Summer School will take place in Cape Town, South Africa, and will be hosted by the School of Economics at the University of Cape Town.

How to apply

Please visit
for further information:
<https://www.e3.uni-kiel.de/de/summer-school>

Application Deadline is
April 15th, 2022.

We strongly
encourage female
researchers to apply.

The summer school is funded by

VolkswagenStiftung

Christian-Albrechts-Universität zu Kiel
